

UNIT 4

Numbers Within 10

Purpose This unit introduces children to adding and subtracting within 10. Children draw to show what they know about adding and subtracting. They then reflect on what they learned at the end of the unit.

Unit Themes

The major themes of the unit are:

- When you join or put together groups, you are adding.
- When you separate or take away groups, you are subtracting.

Show What You Know

Before starting the unit, have children draw to show what they know about adding and subtracting.

Support Whole Class Discussion

Have children think about groups of objects they might want to put together or take away from.

- *What are some things you might want to put together? What is a story you could tell about that?*
- *What are some things you might want to take away from a group? What is a story you could tell about that?*

Support Growth Mindset

At the end of the unit, review skills with children and have them draw to show what they learned on the **Student Worktext Self Reflection** page. Encourage children to revisit the work they did in each lesson as they think about what to draw.

UNIT 4 Numbers Within 10 Addition and Subtraction

Show What You Know

Pictures will vary. Children's drawings for addition and subtraction may show two small groups of objects or shapes in which both groups are circled as one group, and a group of some objects or shapes in which a smaller group has been crossed out or circled.

Have children draw to show what they know about adding and subtracting. Tell children that after they have completed the unit, they will draw to show what they learned.
